

### Wisenet X Series

**Wisenet X** series features the most powerful chipset ever incorporated into a full camera range.

Hanwha's self-developed Wisenet 5 chip uses an all-new architecture that enables faster processing. This means the highest quality video performance with essential features suited to a wide range of video security applications.

### Wisenet P Series

Hanwha Techwin enhances its legacy in video surveillance with **Wisenet P** Series. Featuring 12MP resolution, H.265 codec, WiseStream technology, PTZ hand-over and advanced video analytics, see why Wisenet P Series is the ideal solution for retail, transportation, banking, corporate facilities and education.

### Wisenet Q Series

**Wisenet Q** series is an affordable product line offering simple but essential features ideal to secure small to medium sized applications. This compact camera solution offers a wide range of indoor and outdoor Bullet/Dome/Vandal cameras to cover multiple application needs for retail, banks, residences, offices or transportation delivering crisp and clear image qualities.

### Wisenet T Series

**T series** offers explosion proof and thermal cameras which ensure a reliable video surveillance system even in the most challenging conditions. Explosion proof cameras can be used in heavy industrial facilities where a single spark may cause an explosion and thermal cameras are suitable for detecting people and objects in difficult weather conditions.

### Wisenet Lite

**Wisenet Lite** series is an affordable product line with simple and essential feature ideal for securing small to medium sized applications. Using WiseNet Lite cameras and NVR with PoE together creates a network solution that saves installation time and cost. These cameras can be installed on entrance/lobbies, parking lots, elevators, hallways, aisles and more.

### Wisenet III Series

**Wisenet III** The WiseNetIII features the most advanced functions from Samsung with 1.3 megapixel to 3 megapixel cameras for high definition images for day and night. Dust-proof, waterproof, and vandal-proof, these cameras are designed to meet the market needs, and meet the high quality standards for professional security systems.
